25. Administrator Reports:

- Shawn Gadow, Director of Technology, presented on the technology department's year. He presented the results of the annual staff survey which showed an increase in satisfaction with equipment and service. Survey showed a slight decline in response time to technical issues. Projects for the year included new staff laptops, new computer tables for OHS labs, Windows 10 upgrade, separated phone and wireless system, new computers for OHS library lab, all switches replaced, internet speed increase, wireless captive portal and the introduction of staff training for 2017-2018. Mr. Gadow surveyed other school districts regarding their bandwidth per student. Survey responses show our district is at the same levels as Byron and Stillman Valley.
- Mrs. Haugh asked OHS about the gap on the math results for the PSAT and what is being done. Mr. Nelson stated he is reviewing results and putting new programs in place to assist with the math program, especially for freshmen class.

- Mrs. Haugh asked OES what supports are in place for the ELL program. Mrs. Virgil stated Mr. Majewski does a great deal of co-teaching with other certified staff in the district, including special education. He also has a paraprofessional that works closely with him during the school day.
- Dr. Baker asked about the counseling reports and stated she was interested in what types of issues counselors are dealing with in regards to students. Miss Cremeens was in attendance and gave an overview of what the OHS monthly report consists of. She stated that perhaps the counseling department could put together a presentation to review what issues are dealt with and what interventions are in place. It was also stated that perhaps a quarterly report would be better for the board.
- Dr. Baker asked about the OHS discipline report and what in school versus out of school suspensions consist of and what causes the numbers to fluctuate. Miss Cremeens gave an overview of what infractions make up the discipline report and what state legislature changes have been put in place that could reflect the change in the numbers.
- Dr. Baker asked about the E-Rate report and how it affects us financially. Shawn Gadow explained that it is a federal program that offers discounts and rebate for technological services in the district. The refunds are based on the district's free and reduced and Medicare population. The discounts to services can change from year to year based on the E-Rate guidelines.

Welding stations were installed this week with wiring to take place in the next week or two. Most of OHS should be re-painted by the time the school year begins.
